

LABORATORY TECHNICIAN

TECHNICAL CENTER IN LOZORNO

Missions

Technical center in Lozorno is the main engineering center in Central Europe for the Exterior Business Group. We are developing brand new products for our premium customers. As part of the technical center, you will be working among international teams of engineers specialized in manufacturing processes, in design, in program purchasing and various other technical functions.

Your main tasks will be to:

- Perform all tests necessary to validate a product in accordance with customers' requirements, OPmobility quality and HSE rules, and test methods
- Develop means/units for testing from specification to acceptance
- Execute and monitor the simple general mechanical work in laboratory (e.g. modification or maintenance of testing means)
- Confirm the compliance of the test sample before the test with Validation engineer
- Analyse the test results and alerts Validation engineer / team leader in case of non-compliance
- Provide technical solutions to improve the behavior of the product in case of non-compliance
- Write laboratory test reports in line with internal management system procedures, and submit it to validation/geometry engineer for approval
- Actively support Training and supervise the temporary staff (operator level) in validation laboratory
- Participate in R&R tests in accordance with laboratory scope
- Is responsible for the cleanliness and proper storage testing means and tools
