

CAD ENGINEER

TECHNICAL CENTER IN LOZORNO

The company

Hungry for challenges? Join a group with innovation at its heart and contribute to the automotive revolution! With 31,000 team members located in 26 countries and a 2020 revenue of €7.7 billion, Plastic Omnium is world leader in intelligent exterior systems, clean energy systems and front-end modules.

Through its offer in the exterior body panels market, Plastic Omnium provides customized multi-material solutions with high added value that increasingly integrate functions and enhance safety to reduce vehicle weight and CO2 emissions.

Our ambition? Provide automakers with cutting-edge equipment and solutions to develop tomorrow's clean and connected car. As a responsible company, Plastic Omnium pays particular attention to diversity and equality within its teams and the Group commits to treat all job applications equally.

Missions

Technical center in Lozorno is the main engineering center in Central Europe for the Intelligent Exterior Systems Division. We are developing brand new products for our premium customers as bumpers, tailgates or roof spoilers.

As CAD engineer you will design and draw technical solutions of plastic parts in accordance with company methodology and the CAD specifications of both - customer and Plastic Omnium. Your main tasks will be to:

- Draw CAD files (sketches, sections, partial models, global models, overall dimensions, tooling/assembly kinematics)
- Use customer tools to check CAD file quality
- Manage the incoming and outgoing CAD file flow with our customer and suppliers and check that CAD files fulfil the previous criteria's
- Update attributes of parts in database (volume, theoretical weight, projected area, painted area)
- Update models based on technical feasibility studies
- Work closely with Engineering Project Manager, Design Leader and extended teams (tooling expert, moldflow engineer, CAE engineer..)

Profile

- University degree (technical, engineering field)
- English language – communication level
- Knowledge of plastic parts design, knowledge of CATIA V5 / Unigraphics
- Good communication skills, team player
- Position suitable for fresh graduate

Salary

- Starting from 1300 Euro in Brutto
