IS A ONCE IN A LIFETIME
OPPORTUNITY TO CHALLENGE
YOURSELF, MEET NEW FRIENDS
AND EXPLORE NEW PLACES

ABOUT THE FACULTY

The Faculty of Mechanical Engineering (FME) is one of the seven faculties of the Slovak University of Technology in Bratislava (STU), the largest University of Technology in Slovakia. FME STU offers high quality education, which is widely recognised and respected by potential employers in Central Europe. The faculty has the second highest graduate employment rate in the country. The Slovak economy benefits from a strong and expanding motor industry sector which means that placements in industry are many and varied, and our students are in great demand by the major manufacturers and their components suppliers.

STUDY AT FME STU

STU
SjF

HERE ARE SIX GREAT REASONS WHY YOU SHOULD STUDY AT FME STU:

1. Tradition and Quality

The Slovak University of Technology boasts the longest history in teaching engineering subjects in Slovakia. Its tradition is reflected by its excellent ranking among Slovak faculties and its international reputation.

2. Professional Career Building During your Study

We will assist you in planning and starting your professional career. The faculty cooperates with dozens of top industrial enterprises, trade organizations, institutions, and universities in Slovakia and abroad.

3. Graduates with a Future to be Envied

After successfully completing their study programme, our graduates will have no problem in finding lucrative jobs. Apart from industrial enterprises, they are also in demand in other production branches, information technologies, educational and research institutions, local government, and trades.

4. Study in English

International students are welcome to enrol onto one of three Bachelor and two Engineering programmes delivered through the medium of English during the academic year 2017/18.

5. Excellent Location

The Faculty is located in Bratislava City centre which has a rich and diverse cultural background and sporting activities within walking distance. It justifies its title of Little Big City and it is included among the six most attractive cities in Europe, and is at the epicentre of and within easy travelling distance to Vienna and Budapest. All in all, being a student in Bratislava is a great experience.

6. Student Accommodation for Everyone

Students are provided with comfortable lodgings in renovated student hostels, along with the option of private flat rental. Numerous extra-curricular leisure time activities are available: gyms, swimming pools, athletic stadiums, cinemas and clubs.

STUDY PROGRAMMES IN ENGLISH 2017/2018

BACHELOR STUDY PROGRAMMES:

1. Applied Mechanics and Mechatronics

2. Automobiles and Mobile Working Machines

MASTER STUDY PROGRAMMES:

1. Applied Mechanics and Mechatronics

2. Production Systems and Quality Management with study branch: Automotive Production
